

# ATCO Resource Subscription Scheme

With demand for licenced ATCOs increasing in the UK, we have launched a subscription service for ATCO resource so you can ensure stable operations.

Our trainees undergo Basic and Aerodrome (ADI) training in Langen, Germany, and in many cases, ADI training is followed by a Surveillance Approach (APS) course.

## Training

Our aim is to provide a continuous training plan that upskills ATCOs and ensures the UK market is sustainably resourced.

### The benefits of the scheme include:

- Long-term generation of ATCO resource for the UK
- Tailored solution for ATC units that have no access to ATCO training facilities, or wish to add stability
- Flexible and reliable ATCO placement for a fixed period
- Continuous supply and reliable service through rotational staffing
- Alleviates need for up-front investment and keeps cost down through rotation of suitably experienced staff
- Addresses flight risk by providing resourcing stability, eliminating recruitment cost, and risk of failed validations

## How it works

- 1** Recruited through a dedicated assessment centre
- 2** Basic and Aerodrome training in Langen, Germany
- 3** In many cases, ADI training is followed by a Surveillance Approach course
- 4** ATCOs return to UK – ready for deployment to your unit

We already have a pool of ab-initio ADI and APS rated ATCOs available, who can be placed on the following basis.

## ATCO Resource Subscription Scheme

- ATCO remains employed by ANSL; operational day to day management by local unit
- Fee includes all employment and on-cost (only local eligible allowances if applicable are to be agreed separately)
- ADI and APS rated atcos available

### ■ Subscription Scheme (rotational)

- No up-front cost and stable cost throughout
- Duration: 4+ years of reliable supply
- Abinitio ATCO enable stable cost

### ■ Tailored resourcing solution available on request

- For example Experienced ATCOs incl. SATCO candidates
- APP rating, OTJIs, Assessor etc.
- Short term or one off placement
