

Recovery & Reinstatement

The Aviation Industry in the UK has been impacted severely by the COVID-19 pandemic. Many Airports have either closed or drastically reduced their operations.

Initial signs of recovery can now be observed despite the slowing effect of the uncertainty generated by the 'traffic light' system for travel in the UK.

To contribute to the successful recovery of the ATM Market we have developed solutions we believe are critical to the reinstatement of a strong UK Aviation Industry.

FREE

ATTIS

Our **Attis** package provides UK Airports with the required measures to reinstate safe and compliant ATM Operations. We would like to offer our **Attis - Basic** package to all UK Airports free of charge.

UPDATED

ATCO Resource Subscription Scheme

To reflect the shift in prioritise resulting from the COVID pandemic we have updated our ATCO Resource Subscription Scheme. At the core of our scheme we provide your ATC Unit with ab-initio ATCOs free of charge until first validation.

ATTIS - Basic

Air Navigation Solutions has developed a package to reinstate safe and compliant ATM services at our Units in Edinburgh and Gatwick.

We can now offer this compliance and recovery package to any ATC Unit in the UK. Utilising the structure of our project **Attis**, we will provide any support required to reinstate a safe, compliant and effective ATM Operation. Using our templates we will work with you to produce the evidence you will require to provide assurance to your Business and the Civil Aviation Authority.

In support of the UK Aviation Industry we offer **Attis – Basic** free of charge to all UK Airports.

The **Attis – Basic** package includes all core elements to reinstate safe & compliant ATM Operations, including

- Competency
- Training
- Rostering
- Cleaning
- Office layout planning
- PPE requirements
- Returning from furlough
- Social Distancing
- Testing
- COVID Risk Assessments
- Engineering

ATTIS - Perfect

The **Attis – Basic** package ensures full compliance and delivers all requirements for a safe and effective reinstatement of ATM Operations.

For the most complex and intense Operations our **Attis – Premium** solution additionally includes a range of components delivering a recovery with a focus on Capacity and Performance.

Our **Attis – Perfect** package is the solution if your operation requires additional elements or you wish to deliver more than the minimum requirement to ensure your ATM Operation is ready for future demand.

Attis – Perfect allows you to select precisely those additional components you do require. Pay only for the services you need and deliver a recovery solution tailored to your ATM Operation.

The **Attis – Perfect** package allows you to select from additional capabilities, including:

- Access to Simulator Facilities
- Simulator data preparation & operations
- Simulator Instructors & Assessors
- Tailored ATC Ops Risk Assessments
- Phased roster optimisation
- ATC Ops Support capabilities

All capabilities will be tailored to your operation. Using our proven project structure and document templates, we will work with you to implement solutions that suit your specific circumstances.

ATCO Resource Subscription Scheme

We launched our ATCO Resource Subscription Scheme to supply the UK ATM Market with qualified ATCO resource. At its heart, the scheme provides you with ADI and APS rated ab-initio ATCO Trainees.

Specific requirements, such as APP ratings, experienced ATCOs, OJTIs and similar can be provided on request.

In response to the current circumstances we have updated the scheme and offer ATCOs free of charge until first validation. Speak to us for more details.

Should you wish to subscribe longer-term, a seamless deployment of a new ATCO will be ensured to complete validation in due time to avoid gaps.

Reduce your cost – we have compared the cost for direct recruitment of ATCOs to our Scheme and our Subscription provide you with a variety of additional benefits at a lower cost than any direct employment options.

Note: Subject to availability and contract.

The benefits of our Scheme are compelling:

- **No up-front investment or risk**, new ATCO provided if trainee is unsuccessful
- **No charge** for training, until 1st validation
- **Stay in control**, extend after 3 years or cancel early in certain circumstances
- Eliminates flight risk & associated costs
- Eliminates all training cost
- Eliminates recruitment efforts and cost
- Provides resourcing and cost stability
- All at lower cost than direct employment

The training our ATCOs have undergone is of the highest standards – so much so in fact that we will provide a training guarantee. Should our trainee fail we will provide another one and your free period starts over.

At Air Navigation Solutions we are committed to the success of our Industry. With safety at the heart of everything we do, we develop tailored solutions designed to help you achieve your objectives and commercial aims.

We provide bespoke air traffic management solutions and work in collaboration with customers to design solutions that are flexible to your needs.

All services are tailored to your operation – contact us to discuss any of our capabilities.
